SIF RELAUNCHES LISTING PROCESS TODAY, FIRST TRADING EXPECTED ON THURSDAY 12 MAY 2016

Indicative price per share set at EUR 14.00

Roermond, the Netherlands – 9 May 2016. Sif Holding N.V. (“Sif” or the “Company”), a leading manufacturer of large steel tubulars which are used as foundation components for the offshore wind and offshore oil & gas markets, today announces the indicative price and placement size for, and the publication of the prospectus in relation to, its planned placement and listing on Euronext Amsterdam.

The Placement consists of a secondary offering only, of up to approximately 35% of Sif’s issued ordinary shares (the “Placement” and the “Shares”) by GKSE Holding B.V. (the “Selling Shareholder”). The offer is limited to private placements to certain institutional investors in the Netherlands and various other jurisdictions. Listing of and first trading in the Shares on Euronext in Amsterdam are expected on 12 May 2016 (on an “as-if-and-when-issued” basis).

Jan Bruggenthijs, CEO of Sif:

“Since its establishment in 1948, Sif has grown from a metalworking firm to a leading company in its field with a focus on foundations for the offshore wind and oil & gas industry. As a trusted supplier of large steel tubulars, such as monopiles, transition pieces and pinpiles and legs for jackets, we have a very strong exposure to the high growth offshore wind market.

In readying Sif for the future, listing and trading on Euronext Amsterdam is an important and logical next step. It will strengthen our business profile and provide us with additional financial flexibility through access to capital markets to support our growth ambitions.

On 11 February 2016, we announced the postponement of our IPO due to high levels of uncertainty in global capital markets and unfavourable equity market conditions. In the meantime, we have kept a close eye on the financial markets’ developments. The level of interest we received from the investment community was and is encouraging and we look forward to further elaborate on our ambitious plans as a market leader in monopiles.”

Key investment highlights

- Operates in a consolidated industry, characterised by high barriers to entry;
- Attractive business model offering high visibility, flexibility and capital efficiency;
- A track record of profitability and strong cash conversion;
- Strong position in oil & gas tubular components, with flexibility to deploy capacity to other markets;
- Anticipated ordinary dividend pay-out ratio will range between 25-40% of Sif's net profit in any given year, depending on the Company's profit in that year, the liquidity position and leverage at that time;
- Led by a senior management team consisting of four members with deep sector knowledge and industry experience of over 25 years on average.

Competitive strengths

Sif is a leading manufacturer in a consolidated industry, characterised by high barriers to entry. Sif's primary products are used as foundation components for the offshore wind and offshore oil & gas industries and consist of monopiles, transition pieces and tubular structures for jackets. Monopiles can be further divided into regular monopiles and XL monopiles (monopiles with a diameter of 7m or larger). Sif continuously invests in production equipment, in particular to increase its production capacities and flexibility to produce XL monopiles and to increase the level of automation.

The latest investment, which is currently in progress, comprises modern dual assembly lines that join monopile sections into a complete monopile and a multi-bay coating facility at its new facilities at the Maasvlakte 2 in the Rotterdam harbour. This facility will enable Sif to complete, deliver, store and load XL monopiles of up to 11m in diameter, 120m in length and up to 2,000 tons in weight.

NOT FOR DISTRIBUTION, DIRECTLY OR INDIRECTLY, IN OR INTO THE UNITED STATES, AUSTRALIA, CANADA, OR JAPAN OR ANY JURISDICTION IN VIOLATION OF THE RELEVANT LAWS OF SUCH JURISDICTION

Sif estimates an increase in installed annual theoretical production capacity of approximately 30% from 225 ktms to 300 ktms per year. Combined with Sif's in-house technology and track record of quality and on-time delivery, Sif is well-positioned to capture incremental demand for XL monopiles.

Financial track record

For the full year 2015, which ended on 31 December 2015, contribution (defined as revenue minus cost of sales) amounted to EUR 100.5 million (2014: EUR 83.6 million). Sif considers contribution to be a better indicator for the performance of the business than revenue, since revenue is impacted by fluctuations in the cost of steel and by third-party and subcontractor services, which are both passed on to customers at no or a limited margin. Gross profit amounted to EUR 71.1 million for the full year 2015 (2014: EUR 56.8 million) and EBITDA reached a level of EUR 55.3 million (2014: EUR 45.7 million).
