

Sif Group

**Sif**

## **Sif Group Roermond set to expand further in the coming years.**

With an eye to the positive future of its markets, Sif Group, with headquarters in Roermond, expands to Maasvlakte 2 in Rotterdam.

In Roermond, approximately € 20 million will be invested in new production equipment and operational modifications to facilitate production expansion.

In Rotterdam, an assembly hall and a coating hall will be build, which will make direct loading of the company's offshore client vessels possible. This facility is planned to be fully operational early 2017.

The majority of the production facilities and the headquarters of Sif Group will remain in Roermond. The expansion will entail additional opportunities for qualified jobs, for instance in project management, engineering and production.
