

Wind Certificate

Powerhouse declares that

SIF Netherlands B.V.

purchased **20.000** Guarantees of Origin (GoOs) to compensate the impact of (part of) their electricity consumption for the following period: **1-1-2019** until **31-12-2019**.

SIF Netherlands B.V. chose for GoOs originating from **wind energy generated by windmills in Europa**.

One GoO guarantees the production of one MWh by renewable sources. The system of Guarantees of Origin is managed by CertiQ and is the only accepted evidence in the Netherlands that a certain amount of electricity is generated from eligible renewable sources.
